BMP Automotive #23

TITLE: SPRAY PAINT COATING and PRODUCT INVENTORY

Regulatory Citation: N/A

Applicability: Spray paint coating used in Cogan spray paint booth.

Purpose: Reduce Environmental and Health Hazards associated with spray painting.

Person or

Department Responsible: Automotive Department Chairman (629-7272)

Schedule: As needed

Procedures:

When any new coatings are brought in for use in the spray booth, the faculty must provide a Material Safety Data Sheet to the Director of Environmental Health and Safety prior to their use in the Spray Paint Booth. If any new chemical products are purchased, the Senior Stores Clerk will notify the Environmental Health & Safety department. The EHS department will review the new coatings or products and update the Automotive Chemical inventory. The Director of EHS will also review the coating's MSDS to ensure that the coating will not pose any new or unnecessary risks to the environmental, students or faculty.

Record keeping: MSDS and chemical inventory

Record Location: HVCC EHS web site chemical inventory
