BMP Automotive #5

TITLE: WASTE ANTI-FREEZE DISPOSAL

Regulatory Citation: 6 NYCRR Part 362

Applicability: Waste Anti-freeze disposal.

Purpose: Proper handling, storage and disposal of waste anti-freeze.

Person or

Department Responsible: Automotive Department Chairman (629-7272)

Schedule: As needed

Procedures: When anti-freeze is drained from automobiles it will be placed in the 55 gallon drum provided labeled, Waste Glycol or Anti-Freeze located in Automotive Laboratory. When the drum is 80% full, the Automotive Technicians will contact the approved anti-freeze disposal/recycling contractor to remove the drum. The Automotive Technician will sign the receipt and maintain the file copy and send a copy to the Director of EHS.

If the Automotive Dept changes vendors, the Director of EHS will be notified to review vendor selection.

Record keeping: waste antifreeze receipt

Current vendor: Sheldon Oil

Record

Location: EHS office environmental files

Contact: Automotive Department Technician (629-7190)
Director Environmental, Health and Safety (629-7163)
